Application/Control Number: 10/679,962 Page 2

Art Unit: 3751

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1, 4, 6, 9-12, 15 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by British (1,443,887). British discloses a ball valve including a body 1, a ball element 4, flexible annular seat having a base 15, a cantilevered portion 17, and a thin connecting portion 16, and a retaining ring 13.
- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claim 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over British (1,443,887) in view of Williams et al. (4,671,308). British discloses a ball valve substantially as claimed but does not disclose forming the seal from PTFE. However, Williams teaches another ball valve seal that is formed from PTFE for the purpose of providing a readily available and durable material for the valve seal. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to make the seal of British with PTFE as, for example, taught by Williams in order to provide a readily available and durable material for the valve seal.
- 5. Applicant's arguments with respect to the claims have been considered but are most in view of the new ground(s) of rejection.

Application/Control Number: 10/679,962

Art Unit: 3751

6. Claims 5, 7, 8, 13 and 14 are objected to as being dependent upon a rejected

base claim, but would be allowable if rewritten in independent form including all of the

limitations of the base claim and any intervening claims.

7. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time

policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE

MONTHS from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later

than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to J. Casimer Jacyna whose telephone number is 571-272-

4889. The examiner can normally be reached on Wed. thru Fri. 9AM-7PM, Mon. 7AM-

1PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Justine Yu can be reached on 703-272-4835. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.
